

A stacked bar chart with 10 bars, each representing a sample. The y-axis represents the count of samples, ranging from 0 to 1000. The x-axis represents the categories, which are color-coded. The categories are: light blue, dark blue, green, red, orange, yellow, pink, brown, grey, and dark grey. The distribution of samples across categories varies significantly. For example, the first sample is dominated by light blue, while the tenth sample has a notable portion in the pink category.
