

A stacked bar chart showing the percentage distribution of 1000 respondents by age group and gender. The x-axis represents age groups: 18-24, 25-34, 35-44, 45-54, 55-64, 65-74, 75-84, 85-94, and 95-104. The y-axis represents the percentage of respondents, ranging from 0% to 100%. The legend indicates that blue represents Male and red represents Female. The chart shows that the majority of respondents are in the 18-24 age group, with a significant portion being male. The percentage of respondents in the 18-24 age group decreases as the age group increases, while the percentage of respondents in the 65-74 age group increases. The percentage of male respondents is consistently higher than the percentage of female respondents across all age groups.

Age Group	Male (%)	Female (%)
18-24	65	35
25-34	55	45
35-44	45	55
45-54	35	65
55-64	25	75
65-74	15	85
75-84	10	90
85-94	5	95
95-104	2	98
